Solutions Found Here.

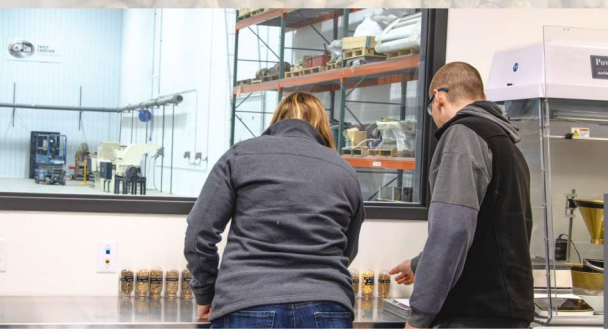

CPM Test Center

CPM's newest Test Center located in Waterloo, Iowa, offers approximately 10,000 square feet of climate-controlled space. This new state-of-the-art facility features a larger space for maneuverability and ease of use, upgraded 'clean lab' with private customer room, and wall-to-wall windows for full viewing of the testing area from the clean lab office area. Here, we help customers discover the exact processability of their materials and provide them with the best solutions for their optimal processing operation.

Facility Equipment

- 1112-2 Pellet Mill
- CCR0505 Counterflow Cooler
- SRC1200-12 Roll Crusher—Full Feature; Stainless Steel
- 11.5" x 28" Hammermill
- TRC900-12 Roll Crusher
- 500 x 500 Gladiator
- 36" x 20" Gyro Sifter
- 24" x 24" Titan
- CL-3 Pellet Mill
- CHHD12 Crusher Head

GENERATING RELIABLE RESULTS

Our Test Center is dedicated to testing materials using specialized equipment, typically involving particle size reduction and pelleting, to determine feasibility, optimize processes, demonstrate capabilities, and generate results. The insights gathered from these tests enable the development of detailed reports, which help specify the necessary equipment for each unique application. Each test serves as an educational opportunity, ensuring a thorough understanding of our solutions. We build partnerships that ensure our customers goals are met with precision.

The philosophy guiding the test center is straightforward: provide solutions to challenges by thoroughly testing each application and generating reliable results. While tests often confirm the suitability of the equipment, they may also reveal when an application is not feasible for the equipment type—information that can prevent unnecessary expenditure of finances and resources. This vital information helps prevent unnecessary spending of resources, ensuring customers are well-informed before committing to significant investments.

At the time of testing, the customer is not only invited to attend but encouraged to do so. Most of those who do attend not only find it a great opportunity to learn more about their specific material but also to learn more about the CPM organization, products, and services. When you are ready to test, please contact us at your earliest convenience and we will be happy to begin the process.
